

VITAL TRACE®

BORDERLESS COMMUNICATION

Recognising the ever increasing demand for flexible cellular services, Vital Trace offer a wide range of mobile data solutions that are fully supported through an online portal. Our Enterprise SIM offers a comprehensive and resilient, large data service package for applications that require data up to 1Tbyte. With a global footprint and advanced capabilities, the Enterprise SIM is designed for IoT big data applications.

- SD WAN services
- Technical support
- Installation and set up
- Online portal access
- System design

“Working with Vital Trace has allowed us to now offer a solution to our customers which ensures that we can stream CCTV cameras 24/7 at a standard annual fixed cost. This allows our clients to set annual budgets safe in the knowledge that no unforeseen data charges will apply which would mean diverting essential funds from other projects.”

OpenView – CCTV & Security Integrators
