

VITAL TRACE®

BORDERLESS COMMUNICATION

Recognising the ever increasing demand for flexible cellular services, Vital Trace offer a wide range of mobile data solutions that are fully supported through an online portal. Our Multinet SIM offers a robust M2M service platform with coverage on a country-by-country basis, regional or global. Available as standard or with public / private fixed IP addresses, the Multinet SIM provides a simple and secure solution for your small data business needs.

MULTINET SIM

For your **small data** business needs

Low Cost Ownership

No more paying for tariffs you may never fully use – saving you money

Live SIMs

Ability to keep SIMs live whilst inactive for long periods

Cost Effective

Better than data bundling where excessive coverage costs can be incurred

Network Blocking

Ability to restrict access to certain networks, specially in-country networks

Multi Networks

Giving better coverage than domestic single network solutions

FEATURES & BENEFITS:

- Low cost of ownership – no more paying for tariffs that you may never fully use
- Ability to keep sims live whilst inactive for long periods
- Voice capable for intercom, access control and alarm panels
- More cost effective than data bundling where excessive overage costs can be incurred if you go out of bundle or bundle data paid for is not used and therefore lost
- Robust M2M service platform
- Data capping applied to ensure that no large unforeseen bills are incurred (caps can be raised at short notice)
- Flexible contract terms – from 30 days
- Network blocking capabilities – ability to restrict access to specific networks, particularly for in-country networks that charge excessive rates, thus lower running costs
- Available as standard or with public / private fixed IP addresses
- Multi network capabilities, therefore giving better coverage than domestic single network solutions
- Coverage on a country-by-country basis, regional or global
- Full technical support
- Installation and setup assistance online portal access
- System design services
